

REDUCE TRAINING TIME & QUALITY DEFECTS WHILE INCREASING SAFETY AND EMPLOYEE MORALE

TRAINING WITHIN INDUSTRY

Job Instruction Module – 5 days

OVERVIEW

Give two employees the same task and chances are they'll each perform it slightly different. For companies who focus on repeatable and predictable results, these differences can be costly.

The need to standardize work in the most efficient way is the motivation behind Training Within Industry (TWI).

CME will be working with companies to facilitate the Job Instruction Module (JI). This module leverages the role of individuals in the organization who direct or influence work to increase productivity, reduce quality errors, reduce training time, improve morale and sustain standard work.

COURSE FACILITATOR

Brett Hiscock
Certified TWI Instructor / LEAN Facilitator

LEARNING OBJECTIVES

Job Instruction Module: Upon completion participants will know how to effectively break down a job into individual tasks and be able to provide instruction on how each task is performed.

WHO SHOULD ATTEND

Individuals who instruct or direct the work of others.

DAILY TRAINING STRUCTURE

- 2 hours of hands-on classroom instruction & demonstration.
- 6 hours of on-the-floor coaching.

COST

\$799 + GST/person (per module) (CME Member)
\$999 + GST/person (per module) (Non-Member)
Plus \$25 for course materials

**deposit required*
