

Accident Investigation Workshop

Tuesday, June 20, 2017 | 7:45 am - 4:30 pm
 Precision Pulley & Idler | Precision Inc.,
 Surrey, BC

BRUCE JACKSON, WSBC

Bruce Jackson is the senior manager of prevention quality for WorkSafeBC, and began his career in workplace health and safety more than 20 years ago while working in the wood products manufacturing industry. He joined WorkSafeBC in 1997.

He's a graduate of BCIT in both occupational health and safety and operations management, and holds a graduate certificate in human factors/safety management systems. Bruce has a provincial instructor diploma, a diploma in adult education, and studied business and economics at SFU. He's a Canadian Registered Safety Professional, a Chartered member of the Institution of Occupational Safety and Health, and a Certified Environmental, Safety and Health Trainer.

Bruce's dynamic presentations provide needed information in an easy to understand and humorous format. The emphasis will be on working in small groups to figure out, on a practical basis, what the words in the legislation say and mean, and to explore the principles of evidence and learn how to apply them in the real world. You will come away better equipped to investigate accidents and to meet your obligations.

ABOUT INNOVATION INSIGHTS

Innovation Insights is a long-standing Canadian Manufacturers & Exporters event series which succeeds in demonstrating innovative technologies and manufacturing processes on-site in a manufacturing facility. Participants and hosts share a common focused goal to achieve increased productivity and profitability for their companies.

The Innovation Insights program is widely recognized throughout Canada's manufacturing community as high-value, with practical demonstrations of manufacturing best practices in technology utilization and process management. The ultimate objective is to enhance the innovative and productive capabilities of Canadian industry.

The tours and sessions provide participants with ideas for improvement and offers learning opportunities with cross-sectorial experts. It is a learning experience for the attendees, with value-added feedback for the host.
